

Lecture

“Creating and Sustaining Biofuels Markets: a comparative analysis of policy in the EU, US, and Brazil”

Friday, September 16, 2011

10:30 a.m. - 12:00 p.m.

FIU—Modesto A. Maidique Campus
11200 SW 8th Street—Miami, FL 33199
Green Library—GL 220

Dr. Robert Ackrill

Professor of European Economics and Policy
Nottingham Trent University—UK

Professor of European Economics and Policy, **Rob Ackrill** is Module Leader for Jean Monnet Europe and the World Economy; and Global and European Economic Issues.

Rob's research interests cover the economics and political economy of EU policies and dynamics of policy reform (especially the Common Agricultural Policy [CAP], EU budget and EU enlargement issues), international trade policies (especially enforcement of trade policy rules in the WTO), and international biofuels policies.

He has a particular interest in research-informed teaching. As well as incorporating his own and others' latest research into his teaching, Rob has developed new and innovative forms of assessment that introduce students to research activities linked to his teaching on the Economics of the EU.

In June 2010, Rob was awarded a Jean Monnet Chair in European Economic Studies by the European Commission.
